

FIRE FIGHTERS GUIDANCE NOTE #1-4

ISSUE: ENCLOSED CABS FOR FIRE TRUCKS

The Section 21 Committee wishes to clarify the requirements of Sections 7 and 8 of Regulation 714/94.

The intent of the Regulation 714/94, Section 7 enclosed cabs, is:

- After December 15, 1995, any new or used fire truck purchased by a fire department in the Province of Ontario is required to have an enclosed cab meeting the requirements of Section 7 before it could be put into service.
- Fire apparatus in service as of December 15, 1995, do not require any special modification or retrofit as long as they remain with the original purchasing fire department. If a jump-seat equipped fire apparatus was sold to another fire department, the need for retrofit would have to be assessed in application to Section 7.

Fire Departments should purchase new or used apparatus with enclosed cabs meeting the requirements of Section 7 of regulation 714/94.
